3 METHODS AND SYSTEMS TO LINK AND MODIFY DATA

4

5 ABSTRACT

6 A method and system to create dynamic associations or links  
7 between objects. In one embodiment, the methods and systems can  
8 utilize the links to modify a document having at least one  
9 object, where based on the association or link, an object in a  
10 document can be replaced with an abbreviated form of the object.

11 A switch, button, or other capability to toggle can allow a  
12 selection and/or display of the abbreviated document and the  
13 unabbreviated version. In an embodiment, the methods and systems  
14 can be used to provide a selectable, pre-configured response in a  
15 document.
